

# How to install pressure switch

Using three way connector

## Pressure switch screw size:

1/4' G thread;

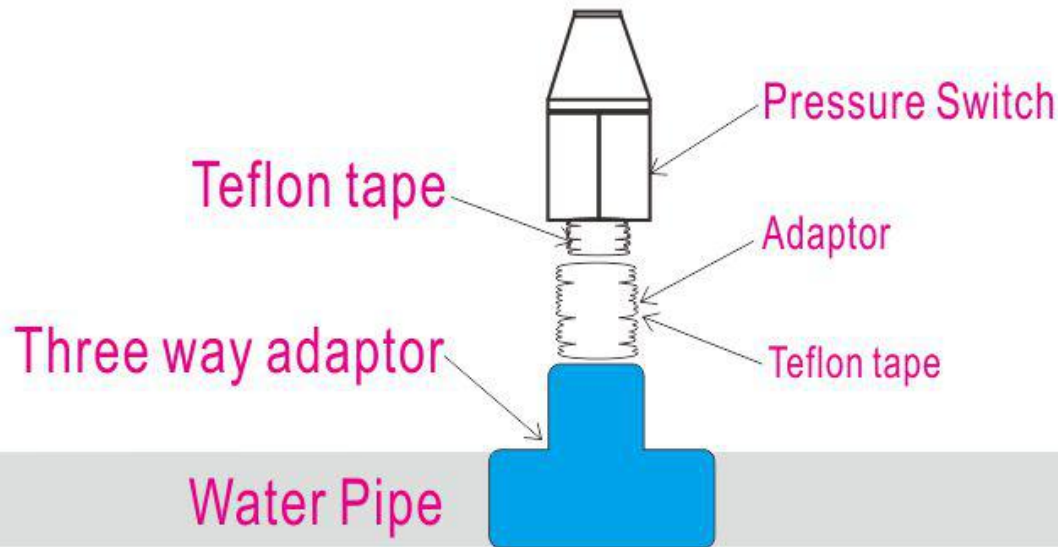

1/8' G thread

1/4' NPT thread

1/8' NPT thread

Suggested three way adaptor you  
can find at our website

Install three way adaptor to the water pipe, connect the pressure switch to the three way adaptor at top, and please keep the pressure switch straight up. This way of installing pressure switch is limited by if user can find right three way adaptor.

1. If user can find right three way adaptor, install the pressure switch as illustrated.
2. If there is no right three way adaptor, try to add one more adaptor between pressure switch and three way adaptor.
3. Please use Teflon tape around connection to prevent Leakage.

Thanks !
